

UNIVERSAL TRANSPORT UNIT

BFAG.net® universal transport unit - STG 35 stack pallet

**Suitable for all steel grids
due to adjustable supports**

**The supports can be removed and
fastened to the pallet for the loading
and unloading**

Clasp to lock the first crowd barrier in place. All remaining barriers lock in automatically.

Unlocked barrier

Locked barrier

Adjustable supports for
different heights

EP 11 782 010.0-1708

Height adjustable supports

- > barriers do not touch the ground
- > no soiling of the hand rails by the feet of the crowd barriers in transport
- > all crowd barriers are transported vertically and in the assembly position
- > no danger of injury due to upturned barriers. The sharp feet do not point

UNIVERSAL TRANSPORT UNIT

BFAG.net® universal transport unit - STG 35 stack pallet

Suitable for all steel grids due to adjustable and distributable supports

- > at H.M.R. 46 BFAG.net® steel grids fit on one pallet
- > stackable from all sides
- > all feet are pointed downwards
- > hand rails are not soiled as the barriers are upturned
- > no danger of eye injuries involving sharp feet pointed upwards
- > rectangular pipes as feet - therefore no longer any points

Up to 4 stackable on top of one another (2 on truck)

The supports of the top barriers are only placed on the large holders of the lower barriers

- > due to the separated supports, barriers can be extracted from the stacked pallet
- > a wheel loader is no longer required for the extraction
- > highest loading safety due to stackable pallets and belt
- > barriers on the pallet have no contact with the ground
- > the first barrier can be locked in position
- > further barriers support each other by means of the wide feet
- > easy extraction as the feet are always positioned downwards. Also - not necessary to turn the barriers
